List of Tables.....	iv
List of Figures.....	v
List of Acronyms and Abbreviations.....	vi
Chapter 1 Introduction.....	1-1
1.1 Overview.....	1-1
1.2 Purpose and Goals.....	1-2
1.3 Scope.....	1-3
1.3.1 Geographic Scope.....	1-3
1.3.2 Water Resource Management Activities Considered.....	1-9
1.3.3 Planning Horizon.....	1-9
1.4 Preparation Process.....	1-9
1.4.1 LTMP Consulting Team.....	1-10
1.4.2 Stakeholder Engagement and Participation.....	1-10
1.5 Document Organization.....	1-14
Chapter 2 Background.....	2-1
2.1 Monterey County Water Resources Agency Mission.....	2-2
2.2 Jurisdiction and Funding Mechanisms.....	2-2
2.3 Water Resource Management.....	2-5
2.3.1 Water Supply Operations.....	2-5
2.3.2 Flood Management.....	2-7
2.3.3 Facilities.....	2-8
2.4 MCWRA Projects and Programs.....	2-15
2.4.1 MCWRA-Led Projects and Programs.....	2-15
2.4.2 MCWRA Partnership Projects and Programs.....	2-22
2.5 Other Applicable Planning Efforts.....	2-37
2.5.1 Central Coast Wetlands Group.....	2-37
2.5.2 Upper Salinas–Las Tablas Resource Conservation District.....	2-40
2.5.3 Transportation Agency of Monterey County.....	2-41
Chapter 3 Historical and Existing Conditions.....	3-1
3.1 Physical Characteristics.....	3-3
3.1.1 Location.....	3-3
3.1.2 Topography.....	3-3

- 3.1.3 Geology 3-5
- 3.1.4 Soils 3-10
- 3.1.5 Climate 3-13
- 3.1.6 Watersheds 3-17
- 3.1.7 Hydrology and Geomorphology 3-19
- 3.1.8 Historical Flooding 3-31
- 3.1.9 Groundwater 3-38
- 3.1.10 Water Quality 3-49
- 3.2 Land Use 3-55
 - 3.2.1 Historical Land Use 3-55
 - 3.2.2 Current Land Use Designations and Land Uses 3-59
 - 3.2.3 Protected Lands 3-61
- 3.3 Water Budget 3-67
- 3.4 Biological Resources 3-67
 - 3.4.1 Ecoregions 3-67
 - 3.4.2 Natural Communities 3-71
 - 3.4.3 Special-Status Species 3-90
 - 3.4.4 Habitat Connectivity 3-95
- 3.5 Environmental Pressures and Stresses 3-99
 - 3.5.1 Changes in Natural Communities 3-100
 - 3.5.2 Altered River Hydrology 3-111
 - 3.5.3 Changes in Climate 3-120
- Chapter 4 Management Plan 4-1**
 - 4.1 Management Plan Drivers 4-1
 - 4.2 Management Objectives and Actions 4-2
 - 4.2.1 Approach 4-2
 - 4.2.2 Definitions of Key Terms 4-2
 - 4.3 Recommended Management Objectives and Actions 4-3
 - 4.3.1 Organization 4-3
 - 4.4 Planning Considerations 4-27
 - 4.4.1 Opportunities Exist for LTMP Development 4-27
 - 4.4.2 Regulations May Drive Management Actions 4-27
 - 4.4.3 The Time is Ripe for Collaborative Implementation 4-28
 - 4.4.4 Management Funding Sources are Needed 4-29
 - 4.4.5 Re-Think Water Management Facility Needs 4-29
 - 4.4.6 Costs and Benefits of River Management Should be Shared 4-29
 - 4.4.7 Flooding Affects the Community 4-30

4.4.8 Wildlife Need Good, Connected Habitat 4-31

4.4.9 Lagoon Sandbar Management Needs to be Multi-benefit..... 4-33

4.4.10 What Happens to Flood Flows and Reservoir Releases? 4-36

4.4.11 The River Changes Over Time 4-38

4.4.12 There is Support for Recreation 4-39

Chapter 5 Implementation Recommendations 5-1

5.1 Implementation Structure 5-1

5.2 Collaboration and Information Sharing 5-1

5.3 Financing 5-2

5.4 Environmental Compliance Strategies..... 5-4

5.5 Monitoring and Adaptive Management 5-5

Chapter 6 References 6-1

Appendix A Glossary

Appendix B Stakeholder Issues Assessment Report

Appendix C HUC-8, -10, and -12 Watersheds in the Study Area

Appendix D Natural Community and Land Cover Mapping Methods and Results

Appendix E Special-Status Species Database Query Results and Potential to Occur Tables

Appendix F Species Accounts

Appendix G Memorandum: Data Source Summary and Data Gaps Identification

Appendix H Memorandum: Regulatory Context

Tables

	Page
1-1	Acreeage of Study Area by County 1-6
2-1	FY 2018–19 MCWRA Revenue by Source 2-3
2-2	Nacimiento and San Antonio Reservoir and Dam Specifications 2-11
2-3	Recommended Measures from Salinas River Lagoon Management and Enhancement Plan..... 2-16
3-1	Geologic History of Salinas Valley 3-9
3-2	Relative Areas of Soil Groups in the Management Area 3-13
3-3	Relative Areas of Soil Groups in the Study Area 3-13
3-4	Average Temperatures from 1981-2010 and 1971-2000 3-15
3-5	Average Annual Precipitation from 1981-2010 and 1971-2000..... 3-16
3-6	Peak Flow Frequency Analyses for Gages in the Upper Watershed..... 3-25
3-7	Peak Flow Frequency Analyses for Gages in the Salinas River Watershed in the Management Area 3-28
3-8	Stratigraphy and Hydrostratigraphy for the Salinas River 3-41
3-9	Designated Beneficial Uses by Waterbody 3-51
3-10	Listed Impairments by Waterbody 3-52
3-11	History of Agricultural Use in Monterey County 3-58
3-12	Area of Land Use Designations in the Study Area 3-60
3-13	Area of Crops within the Management Area in 2014 3-61
3-14	FMMP in Study Area and Management Area 3-62
3-15	Conservation and Agricultural Easements Within the Management Area and Study Area 3-64
3-16	Protected Areas Within the Management Area and Study Area..... 3-66
3-17	Extent of Natural Communitiesa and NVCS Land Cover Types in the Management and Study Areas 3-74
3-18	Target Species with the Potential to Occur in the Management Area and Study Area 3-92
3-19	Arundo Impacts on Threatened and Endangered Species in the Salinas River Watershed 3-105
3-20	Nonnative Fish Species Observed in the Salinas River Watershed and Its Associated Tributaries..... 3-108
3-21	Annual Wildfire Burned Area in the LTMP Study and Management Areas from 2000 through 2016 3-111
3-22	Opening and Closing Dates of Sandbar at the Mouth of the Salinas River..... 3-119
3-23	Current and Predicted Future Monterey Tidal Elevations..... 3-123
4-1	Salinas River LTMP Recommended Management Objectives and Actions ¹ 4-6
4-2	Salinas River LTMP Listed Species Objectives and Actions 4-20
5-1	Federal and State Grant Opportunities for Watershed Programs..... 5-2

Figures

	Page
1-1 Regional Location.....	1-5
1-2 MCWRA Zones of Benefit and River Management Units	1-7
1-3 Study Area and Management Area Boundaries	1-8
2-1a Water Management Facilities on the Lower Salinas River	2-9
2-1b Water Management Facilities on the Upper Salinas River	2-10
2-2 Nacimiento and San Antonio Reservoir and Dam Specifications	2-12
2-3 Monterey Regional Treatment Plant and Recycled Water Irrigation Pipe Alignment	2-25
2-4 Salinas Valley Groundwater Basin	2-27
2-5 Greater Monterey County Integrated Regional Water Management Plan Region	2-31
2-6 Disadvantaged and Suspected Disadvantaged Communities in the Greater Monterey County Integrated Regional Water Management Region.....	2-34
2-7 Watersheds in the Study Area	2-35
2-8 Coastal Climate Change Hazard Zones in Northwestern Monterey County.....	2-38
2-9 Assessment Locations and Scores from the California Rapid Assessment Method for Wetlands	2-40
3-1 Topography	3-4
3-2 Tectonic Setting of Salinas Valley	3-6
3-3a Geologic Map	3-7
3-3b Description of Geologic Map Units	3-8
3-4 Soils Map.....	3-11
3-5 Chart of Relative Areas of Soil Groups in the Management Area	3-12
3-6 Chart of Relative Areas of Soil Groups in the Management Area	3-12
3-7 Distribution of Precipitation across the Study Area	3-16
3-8 Major Watersheds in the Study Area.....	3-18
3-9 Historical and Existing Terminus Location of the Salinas River	3-22
3-10 Mean Monthly Flow in Nacimiento River, Before and After Dam Construction (USGS 11149400 & 11149500)	3-25
3-11 Mean Monthly Flow in Salinas River at Bradley, Before and After Dam Construction (USGS 11150500)	3-25
3-12 Mean Monthly Flow in Salinas River near Spreckels, Before and After Dam Construction (USGS 11152500)	3-28
3-13 Percent of Time the Salinas River Lagoon Marsh Plain was Inundated by Water for 2015–2017	3-29
3-14 Water Resources Data of the Salinas River Lagoon from 2015–2017	3-30
3-15 Salinas River Valley Flooding in RMU 6 along Highway 101 in March 1995	3-32
3-16 Salinas River Lagoon and RMU 7 Flooding in March 1995	3-33
3-17 Locations of Major Surface Water Pump Stations in the Gabilan/Tembladero Watershed	3-34

3-18a December 2014 Flooding in the Gabilan/Tembladero Watershed Compared to the FEMA 100-Year Inundation Areas3-36

3-18b FEMA Flood Zones in the Study Area.....3-37

3-19 Groundwater Elevation in the Northern Salinas Valley Based on USGS Groundwater Well Data (1970–1980) with Wells Containing at Least 10 or More Measurements (=N) During that Time3-43

3-20 Total Reported Groundwater Extraction in the Pressure Subbasin.....3-44

3-21 Total Reported Groundwater Extraction in the Eastside Subbasin3-45

3-22 Total Reported Groundwater Extraction in the Forebay Subbasin3-45

3-23 Total Reported Groundwater Extraction in the Upper Valley Subbasin.....3-46

3-24 Cumulative Area with Time of Seawater Intrusion in 180- and 400-Foot Aquifers (areas with chloride exceeding 500 mg/L)3-47

3-25 Annual Reported Groundwater Extractions in the Pressure Subbasin “Area of Impact” from 1995 to 2015.....3-48

3-26 Impaired Waterbodies in the Gabilan/Tembladero Watershed.....3-52

3-27 Land Use Designations.....3-56

3-28 History of Agricultural Use in Monterey County3-58

3-29 Farmland Mapping & Monitoring Program3-62

3-30 Projected Lands.....3-64

3-31 Central California Foothills and Coastal Mountains Level III Ecoregions.....3-68

3-32 Natural Communities and Developed Lands3-72

3-33 Moro Cojo and Elkorn Slough Protected Areas3-86

3-34 Salinas River Lagoon Protected Lands3-87

3-35 Essential Connectivity Areas3-96

3-36 Stream Classifications, Barriers, and Native Fish Habitat in the Salinas Watershed3-98

3-37 *Arundo donax* Growing in the Salinas River Channel3-102

3-38 Extensive Growth of Floating Aquatic Plants and Algae in the Salinas River Lagoon During October.....3-106

3-40 Old Salinas River Slide Gate Looking Southwest Toward the Salinas River Lagoon3-116

3-41 Coastal Climate Change Hazards in the Coastal Zone.....3-124

4-1 Salinas Valley Water Management System Conceptual Model.....4-37
